

Intel Energy Policy

At Intel Corporation, we are committed to caring for people and the planet from the development of our products, through our supply chain and manufacturing. In support of our [Environmental Health and Safety Policy](#) and our [Climate Change Policy](#), we have a responsibility to minimize the use of energy in our buildings, factories, and supply chain. We also believe that our technology will play a key role in addressing the planet's sustainability challenges.

We are committed to these principles:

- Following the letter and spirit of all applicable regulatory and Intel Climate, Energy, and Environmental requirements related to energy efficiency, energy use, and energy consumption wherever we operate.
- Continually improving our Energy Management System, including our business standards, culture, and energy performance.
- Setting and reviewing objectives and energy targets to deliver improvement in energy performance.
- Ensuring the availability of information and necessary resources to achieve objectives and energy targets where practicable.
- Improving energy performance and reducing carbon intensity of our operations through our design activities and procurement of energy-efficient products and services.
